

Network Security Audit Report

Target: scanme.nmap.org | Date: 2026-07-06 02:10 | Auditor: Rawan Rany

Executive Summary

This report presents the findings of an automated network security audit conducted against scanme.nmap.org. A total of 2 open ports were identified. Each finding includes a severity rating and recommended remediation action.

Findings

Port	Proto	State	Service	Version	Severity
22	tcp	open	ssh	6.6.1p1 Ubuntu 2ubun	Low
80	tcp	open	http	2.4.7	Medium

Recommendations

[Low] Port 22 - SSH

SSH is secure. Ensure strong passwords or key-based auth.

[Medium] Port 80 - HTTP

HTTP is unencrypted. Redirect all traffic to HTTPS.
